STREET FOR PEOPLE

Reconnaissance Survey of Smart City – Street Design

SHASHWATI MISAL

DIV-B ROLL NO- 2

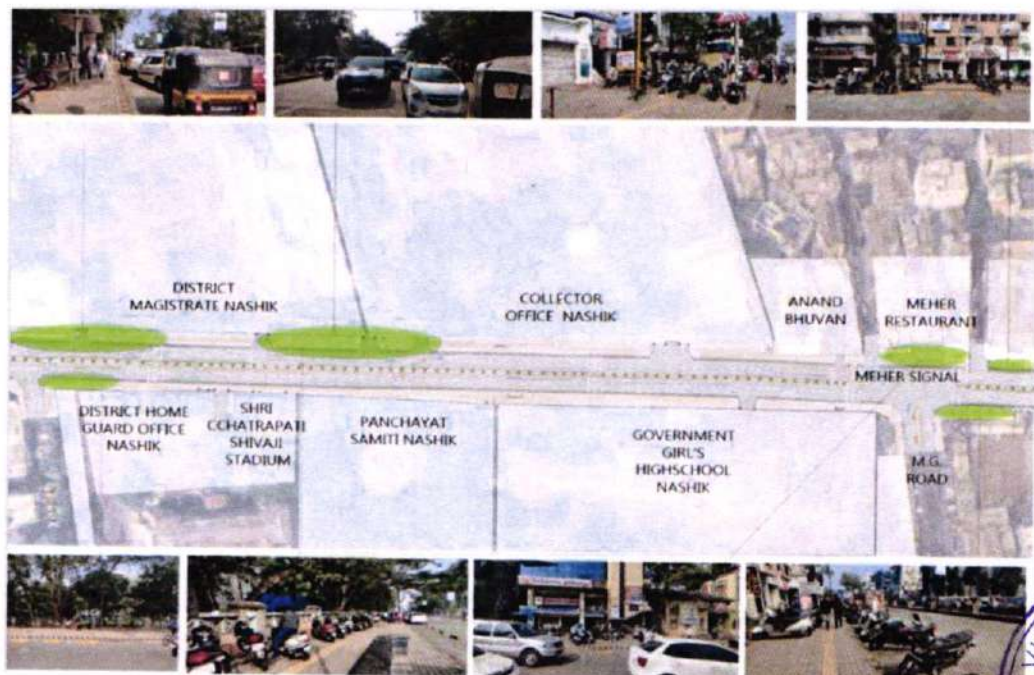

GROUP MEMBERS-

- SHASHWATI MISAL
- DIVYA PATIL
- NEHA SETHIA
- VAIBHAV MOHOD
- CHAITANYA BHUTADA
- VRUTIK GAIKWAD
- RASHMI AHIRE
- SURESH CHOUDHARY

STREET FOR PEOPLE

The assigned street is located at one of the most prime locations connecting the old Nashik city centre to the urban. The street caters to some of the most major hotspots of the old city including- Nashik High Court, Shreya Hospital, Government Girl's High School, Collectors Office Nashik, Chatrapati Shivaji Maharaja Stadium, Panchayat Samiti Nashik, etc.

The aim of the competition is to develop a street- i.e. the pedestrian sidewalks in a people friendly space, which encourage a safer & inviting environment all throughout the day.

Plan of the street.

Street Analysis

- Activities are spread across the site in a random manner countering to the allotted space give to the specified activity.
- Seatings provide not adequately used.
- No allotted space for vendors
- Bus stops placed at very close intervals, which attracts commotion.
- Public toilets are located far away form the junction.
- Very poorly maintained public toilets.
- Few property lines are not in a appropriate state. Needs intensive development.
- There lacks signage for dominating the cycle tracks, public washrooms , parking, no parking zones. Speed limit.
- Inadequate street lighting.
- Bus stops placed at very close intervals, which attracts commotion.

- Allotted space for the rickshaw stand at the Meher signal junction is atrocious.
- Its allotted at the zebra crossing junction on the footpath, which tends to create a deal of commotion.

- Activities are spread across the site in a random manner countering to the allotted space give to the specified activity.
- Seatings provide not adequately used.
- No allotted space for vendors

- Despite of parking provided in the premises people tend to park on the busy road, on the cycle tracks and the footpaths which completely defeats the purpose of their appointed activity.

- Misuse of cycle track provided.

- Lack of parking space. Results in people parking on the footpath.
- No halting space provided.

- Poor elevation treatment for the property lines.
- The lighting provided along the sidewalks aren't adequate enough to liven the space and make it feel safer.
- Pedestrian traffic is comparatively heavier during the office hours on the court sidewalk
- But yet again due to the Covid- 19 lockdown, it is difficult to analyze the pedestrian activity on the Govt. Girl's High school. Due to the temporary shutdown of the schools and college.
- According to a survey conducted on the site a sample of 10 people were considered, amongst them – 5 men, 5 women
- 100% of the sample have insisted on improving the current condition of the public bathrooms.
- 60% of them have requested on better seating conditions.
- 40% have asked for adequate lighting in the evening.
- 10% of the sample asked to keep the sidewalks in the same condition as it is. No changes.

Brief about the Program (Activity/Event)	<p>Hon. Commissioner of police approached the institute to work with students to solve the traffic problems at various junctions in Nashik. The project was taken under two subjects namely Research In Architecture and URBAN STUDIES with 4th Yr. B-Arch students. Students were distributed in groups to cover approximately 82 major junctions across city. Students did an extensive survey of the junctions to identify issues. This was done methodically using the Survey Templates prepared in the studio. Survey Research was accompanied by representatives of traffic police. Collected Data was then processed to analyse and arrive at Design Solutions to resolve the issues / improve the conditions. The presentation was given at Commissioner's Office and was taken ahead for implementation. For more critical junctions, students improvised the proposed solutions as per the discussion, inputs, & suggestions from RTO & Police Officials; and monitored the same on-site. The work has been appreciated also by the Cabinet Minister Mr. ChhaganBhujbal in a Public Program named – 'BharosaKaksh'</p>

Brief about the Program (Activity/Event)	<p>Based on the workshop conducted by Mr. Avinash Patil, a Field Survey was planned to study the existing infrastructure in the 3 villages from the Rural-Urban Fringe areas of Nashik; for Urban Development Dept. Govt. of Maharashtra.</p> <p>Before going to actual sites, students prepared an extensive Questionnaire for the same. Infrastructure such as road connectivity, water supply, waste disposal system, primary health center, electricity supply, etc. are to be surveyed. 50 sample cases are interviewed. The analysis was done w.r.t. individual village, data matrix is generated using the findings from the Questionnaires and facts were presented through bar graphs & pie charts.</p>

Brief about the Program (Activity/Event)

Every year workshop topics are identified to value add the course curriculum under various subjects. Efforts are taken to call the experts from the field to conduct the workshop. Activities based on the workshop learnings such as assignments, analytical studies, field visits, surveys etc. those are needed to achieve the workshop outcomes, are undertaken during lectures allotted for institute philosophy for the respective year which are over and above the stipulated time for the respective subject conduct. The workshop on streets for people was conducted by 'Institute for Transportation and Development Policy (ITDP), India' for fourth year B. Arch students, subject of Research in Architecture, under the Institute Philosophy – "Learning by Doing". The workshop was conducted in composite manner with partial conduction by expert and partial conduction at institute level under the guidance of core faculty. It is a step towards the betterment of Indian Urban streets by designing them to encourage non-motorized and public transport by meticulously analyzing the patterns of street usage by people in response to factors like availability of footpaths, shading on streets, lighting provisions, vehicle speed, amenities, safety, user friendliness and many more. Students surveyed the identified main streets within the Nashik city and mapped the observations. After analyzing the same, street design proposals were generated under five parameters of walkability, parking, footpaths, crowd streets mapping and building use. ITDP being an advisory body for the local authorities, the proposals thus generated are aimed to be presented to the Municipal Corporation, Nashik in the form of street design guidelines for further development and execution. The work was also exhibited at various locations for public by Lokmat Nashik First.
