### PO 6 - INCLUSIVITY

#### PO SUMMARY

#### Climatology

#### Course Outcomes for Climatology:

2201925.1	CO 1	The students should be able to relate climate and architecture, recognize the various climatic zones in India with respective traditional climate responsive architecture.
2201925.2	CO 2	The students should be able to understand climate as a determinant of architectural design and various climate responsive building design criteria.
2201925.3	CO 3	The students should be able to apply climate responsive building design for various climates and microclimatic site conditions.
2201925.4	CO 4	The students should be able to examine, correlate and illustrate the different climate responsive design strategies applicable for site microclimate and climatic zones in India.
2201925.5	CO 5	The students should be able to compare and justify applicability of various climate responsive building design strategies in architectural design to achieve thermal comfort.
2201925.6	CO 6	The students should be able to propose climate responsive design solutions to integrate with their architectural design projects.

### PO SUMMARY

#### **Environmental Science**

#### **Course Outcomes for Environmental Science:**

2201930.1	CO 1	The students should have basic introduction to Multidisciplinary nature of environmental studies with focus on Natural Resources, Eco Systems, Biodiversity and its conservation, Environmental Pollution, Environment Legislation and Social aspects of environment, Environment friendly buildings.
2201930.2	CO 2	The students understand Multidisciplinary nature of environmental studies, current environmental issues and its interconnectedness with architecture/development.
2201930.3	CO 3	The students should be able to apply knowledge of environmental studies to understand interconnectedness of current environmental issues and architecture/development.
2201930.4	CO 4	The students should be able to analyze current environmental issue and its interconnectedness with architecture/development.
2201930.5	CO 5	The students should be able to judge and recommend architectural interventions to minimize current environmental issues.

### PO SUMMARY

#### Urban Studies – II

#### Course Outcomes for Urban Studies–II:

4201565.1	CO 1	The course will enable students to relate to the process of urban planning and urban design from the point of view of various urban issues like urban economics, transportation, people centric designs etc.
4201565.2	CO 2	Students will differentiate between urban planning and urban design and understand the process of both disciplines for its wider applicability.
4201565.3	CO 3	Students will be able to apply the knowledge of urban design to conduct various surveys to identify urban issues.
4201565.4	CO 4	The course will make students to analyze various the data collected through surveys for various urban issues.
4201565.5	CO 5	Students will be able to compare and evaluate the data collected through surveys for resolving the urban issues identified
4201565.6	CO 6	The course should prepare the students to design and make proposals based on data collected, analyzed and evaluated to resolve the urban issues identified.

### PO SUMMARY

#### Contemporary Seminar

#### Course Outcomes for Contemporary Seminar:

3201552.1	CO 1	The students should be able to relate and recall the various features of the architectural styles which emerged in the 19th and 20th century.
3201552.2	CO 2	The students should be able to interpret and establish a critical viewpoint about contemporary trends and approaches in architectural production.
3201552.3	CO 3	The students should be able to identify and construct the relevance of the thought process about contemporary architecture in today's context.
3201552.4	CO 4	The students should be able to inspect, infer and categorize the contemporary trends and approaches in terms of design.
3201552.5	CO 5	The students should be able to conduct a critical inquiry into the contemporary thought process and interpret or deduce its relevance / validity in today's context.

### PO SUMMARY

### Elective III

#### Course Outcomes for Elective III

Elective III	4201569 (SS)	4201569.1	CO 1	Students will choose an area of interest based on their previous knowledge / exposure for further exploration.
		4201569.2	CO 2	Students will understand a particular allied field chosen in detail to clarify that field's concepts and application and its links with design as a faculty.
		4201569.3	CO 3	Students will be able to develop special skills in the particular allied field chosen in terms of application by exploring the recent developments in the field of architecture.
		4201569.4	CO 4	Students will be able to analyze various examples / case studies / practices in the particular allied field chosen and to compare the same with larger context of overall sphere of Architecture.
		4201569.5	CO 5	The course will prepare students to determine the importance as well as judge their interest in the particular allied field chosen to decide their further course of career.
		4201569.6	CO 6	The course will train students to explore projects in the particular allied field chosen to build their interest and understanding in that field.

### PO SUMMARY

#### Landscape Architecture – I

#### Course Outcomes for Landscape Architecture-I:

3201539.1	CO 1	Students will be able to define the scope of Landscape architecture based on their knowledge and exposure on various factors which are required in landscape practice.
3201539.2	CO 2	Students will understand various elements, principles of landscape architecture and relate to the necessity of being sensitized towards appropriate landscape practice on the basis of Historical references.
3201539.3	CO 3	Students will be able to apply their knowledge in site planning and designing based on various landscape factors for achieving functional, aesthetic, environmental and Cultural goals.
3201539.4	CO 4	Students will be able to discover, classify, and analyse different natural and manmade aspects such as Microclimate, topography, hydrology, vegetation, physical and socio-cultural context through various examples / case studies / practices in field of landscape architecture.
3201539.5	CO 5	Students will be able to build their interest in landscape architecture by appraising various works in the field and its scope.
3201539.6	CO 6	The course will guide students to, formulate and develop design proposal for pilot projects culminating into an idea, concept generation and visualization that encourages creative thinking.

### PO SUMMARY

#### Elective - II

#### Course Outcomes for Landscape Elective-II:

4201561.1	CO 1	Students will choose an area of interest based on their previous knowledge / exposure for further exploration.
4201561.2	CO 2	Students will understand a particular field of specialization chosen in detail to clarify that field's concepts and application.
4201561.3	CO 3	Students will be able to develop special skills in the particular field of specialization chosen in terms of application by exploring the recent developments in the field of architecture.
4201561.4	CO 4	Students will be able to analyze various examples / case studies / practices in the particular field of specialization chosen and to compare the same with larger context of overall sphere of Architecture.
4201561.5	CO 5	The course will prepare students to determine the importance as well as judge their interest in the particular field of specialization chosen to decide their further course of career.
4201561.6	CO 6	The course will train students to explore projects in the particular field of specialization chosen to build their interest and understanding in that field.

### PO 7 – TECHNOLOGICAL KNOWHOW

#### PO SUMMARY

#### **Advanced Building Technology & Materials – I**

#### **Course Outcomes for ABTS-I:**

4201555.1	CO 1	To find out difference between regular and advanced construction techniques involved by recalling the previous knowledge.
4201555.2	CO 2	Student should be able to understand and compare various construction techniques and services involved.
4201555.3	CO 3	Student should be able to apply the acquired knowledge to solve the various issues related to advanced construction technology and services.
4201555.4	CO 4	Student should be able to analyze data (materials, products) available locally and internationally through survey and market study.
4201555.5	CO 5	The student should be able to justify the method selected to solve the problem.
4201555.6	CO 6	The student should be able to propose proper construction technique to improve the design.

### PO SUMMARY

#### Building Technology & Materials V

#### Course Outcomes for Building Technology & Materials V

Building Technology & Materials V	3201536 (SV) & 3201537 (PP)	3201536.1	CO 1	The student is able to identify and relate different types of Interior elements, RCC flooring systems and long span structures.
		3201536.2	CO 2	The student is able to understand characteristics and properties of various Interior elements, RCC flooring systems and long span structures.
		3201536.3	CO 3	The student is able to make use of technology to develop different possibilities of assembling interior elements.
		3201536.4	CO 4	The student is able to survey, classify and examine different types of technology and materials suitable for Interior elements, RCC flooring systems and Long span structures.
		3201536.5	CO 5	The student is able to inculcate an analytical thinking about selection and application of appropriate material and technology.
		3201536.6	CO 6	The student is able to propose an appropriate solution for a specific design requirement related to Interior elements, RCC flooring systems or Long span structures.

### PO SUMMARY

### Building Technology & Materials VI

#### Course Outcomes for Building Technology & Materials VI

Building Technology & Materials VI	3201546 (SV) & 3201547 (PP)	3201546.1	CO 1	The student is able to identify and define different type of building materials, earthquake resistant frame structures, retaining walls, modular co-ordination and steel structures.
		3201546.2	CO 2	The student is able to understand characteristics and properties of various building materials, earthquake resistant frame structures, retaining walls, modular co-ordination and steel structures.
		3201546.3	CO 3	The student is able to make use of technology to develop different possibilities for earthquake resistant frame structures, retaining walls, modular co-ordination and steel structures.
		3201546.4	CO 4	The student is able to survey, classify and examine different types of technology and materials suitable for building construction.
		3201546.5	CO 5	The student is able to inculcate an analytical thinking about selection and application of appropriate material and technology.
		3201546.6	CO 6	The student is able to propose an appropriate solution for a specific design requirement related to earthquake resistant frame structures, retaining walls, modular co-ordination and steel structures.

### PO SUMMARY

### Working Drawing II

#### Course Outcomes for Working Drawing II

Working Drawing II	3201543 (SS)	3201543.1	CO 1	To know the basics of working drawing and check list of drawings
		3201543.2	CO 2	To understand various term used in working drawing along with graphical representation and annotations
		3201543.3	CO 3	To develop and apply graphical representation in working drawing.
		3201543.4	CO 4	To classify, analyze and compare various drawings and its co-relation with each other
		3201543.5	CO 5	To acquaint students with the methodology and sequence of various working drawings and its importance in professional practice
		3201543.6	CO 6	To create a working drawing set of an architectural design

### NOTICE

Ref / IQAC / B-Arch

Date: 11 / 09 / 2018

To,

The faculty teaching various subjects in B-Arch program are informed about the appointment as a "Subject Coordinator", as an IQAC initiative for the AY: 2018-19.

All the appointed ""Subject Coordinators" will have a scheduled meeting on Tuesday 14/09/1018 @ 12:00 pm to 12:30 pm, to discuss their Academic Roles and Responsibilities.

Sr.	Subject Coordinator	Subjects
1	Dr. Prajakta Baste Prof. Arpita Bhatt	BD / AD-1 / FOA / AD-2,3 / AD-4,5 / AD-6,7 / AP-1 / AP-2
2	Prof. Aashish Khemnar	BCM-1,2 / TOS1,2 / SSA / BCM3,4 / TOS3,4 / BCM5,6 / TOS-5,6 / ABTS-1,2 / UD-1,2
3	Prof. Umesh Hirave	AGD-1,2 / WS-1,2 / CACD-1,2 / WD-1,2
4	Prof. Purva Shah	Elec-2 / Elec-3,4,5 / LA
5	Prof. Suruchi Ranadive	Com. Ski. / HOAC-3,4 / Elec-1 / RIA-1,2
6	Prof. Gaurav Arbooj	PT / SW / PP / QSE
7	Prof. Megha Butte	BS-1,2 / BS-3,4 / Env. Sci. / Clima.

We shall have a meeting on Monday 17/09/2018 @ 9:00 am for further discussion on the same topic.

**IQAC Co-ordinator**

COLLEGE OF ARCHITECTURE  
Nashik

Principal

**IQAC CHIARPERSON**  
Maratha Vidya Prasarak Samaj's  
College of Architecture, Nashik-13

## MVPS's College of Architecture

Udhaji Maratha Boarding Campus, off Gangapur Road, Nashik

Phone : 0253-2570822 Email : cansnashik@mvp.edu.in

### Roles and Responsibilities of the Subject Co-ordinator:

1. To guide the subject teacher in preparation of Teaching Plans of all years / classes of the concerned subject.
2. To overview and monitor the integration of subject 'vertically' as well as 'horizontally' in the curriculum of B-Arch Program.
3. To act as a facilitator in identifying resources / guest speakers personnel, resource material for upgrading the teaching - learning process.
4. To supervise and monitor e-content preparation of the subjects.
5. To conduct meetings as and when required for fulfilment of tasks with the subject teachers.
6. To establish standard type of format of "CIE" for the subject.
7. To identify, encourage, and organize competitions / quizzes w.r.t. subjects, for widening the knowledge base of students.
8. To help prepare, establish and keep the records for the academic year.
9. To guide in matters to improve and upgrade the quality of submissions.
10. To report to IQAC at the end of semester, about feedback of current semester.
