ABOUT THE BOOK:

The book shares insights of the Nature Nurture team in answer to the question 'can you make an entire city accessible?'

It shares the journey of how, in order to make a single space accessible, every space leading up to it needs necessarily to be accessible as well.

It also shares contemplations at how to tread the middle path that looks at existing processes and practices, while merging them with accessibility solutions that will provide dignified and complete access to everyone.

Certificate Course - A Joint Workshop on 'Exploring Patterns'

Curriculum and detailed activity schedule

Exploring Patterns through unit and repetition and fractals. At Nasik on 14th, 15th and 16th October 2016

The Team:

Team AOAU : Prof. Shripad Bhalerao, Ar. Joel Roy, Teja Gavankar, Ar. Recheal Mewada
Team MVPS's COA : Prof. Umesh Hirwe, Prof. Ketaki Joshi, Prof. Gitanjali Patil, Prof. Nishtha K., Prof. Ankita Pathare, Prof. Sharmishtha S., Prof. Sachin Wagh, Prof. Nakul Bhavsar

Number of students:

From AOAU – 39 students

From MVPS's COA – 81 students

Aim:

- To explore patterns in geometry and simplify them using basic rules of geometry. Adopt the patterns to create Unit.
- Repeating the unit to arrive at a progressive or fractal pattern.
- Using the pattern explore various making techniques like weave, connect, join and build a human scale form. To erect the form with basic functions around or within it.

Learning Objective :

- To Understand simple geometric patterns.
- Learn to set rules to develop rule based pattern
- To explore unit and repetition in Two dimensional and three dimensional geometry
- To explore making materials like Bamboo, Corrugated Board, Petbottles, Rope and Used flex with various properties.
- To make large size pattern based models with hand on skills to be learnt.
- To understand form and basic functions once the installation is ready.

Methodology:

- One pre workshop module on fractals and unit and repetition will be run by both institutes prior to the actual workshop
- The patterns created in Pre Workshop Module will be Identified and Curated by the faculty for final making modules to be erected during workshop.
- During 3 days of workshop the students will create prototypes, joint them in a rule based manner and finally erect and or install the large scale installation.
- This is an explorative workshop to understand rule based incremental geometric patterns

Brief about the Program (Activity/Event)	<p>Certificate course on Bamboo – Geodesic dome was conducted in consolidated manner for consecutive 4 days.</p> <p>The course began with Ar. Jayesh imparting basic knowledge about the properties and potential of the material. During two days students were also trained to treat bamboo for construction purpose and utilise the same for different joineries. The outcome was a Geodesic Dome. The modules required for the dome were to be made using bamboo sections joined by steel plates. The various tasks of cutting the bamboo to appropriate lengths with precision, cutting steel plates, drilling holes in the plates and nut bolting them together was allocated to different groups of students. Finally after the preparation was done, the assembly of the geodesic dome was completed.</p>
Outcome	<p>The process of part to whole was a valuable learning for the students and in coherence with the institute philosophy 'Learning by doing' and Co-existence with Nature'. All of them were inspired by the innumerable possibilities that this wonder grass had to offer, that too with the minimum environmental impact.</p>

Brief about the Program (Activity/Event)	<p>Certificate course on Parametric explorations with bamboo was conducted in consolidated manner for consecutive 4 days.</p> <p>The course kick-started with a presentation by Akshay and his team showing various types of bamboos, the treatment given to them to increase their life and various projects carried out by them.</p> <p>During first two days they designed a parametric façade for the college building along with a hyperbolic pavilion. The parametric façade consisted of 36 modules made from bamboo frames. The frames were joined together by strips of sliced bamboo of various lengths that gave it a dynamic and parametric form.</p> <p>During next two days, the students used the techniques learnt for a small 4' x 4' module on a larger scale to make a hyperbolic pavilion of 20' X 20'. The pavilion consisted of 8 triangular frames which were joined together by nut-bolt system and supported by bamboo props initially. As the strips of sliced bamboo were fitted, the props could be removed.</p>
Outcome	<p>Students were introduced to bamboo as construction material and various possibilities and potential of Bamboo as a modern material. Parametric façade making with bamboo reflected modern architectural innovation possible with Bamboo which is generally looked upon as a vernacular material. During the process, students got hands on experience of working with bamboo and various cutting, joinery techniques used while working.</p>

Brief about the Program (Activity/Event)	<p>Certificate course on Universal Design was conducted by Ar. Parul Kumtha from Mumbai for students of fourth year B. Arch to under, Design and Technology Elective (Elective –II). The course was conducted in composite manner with partial conduction by expert and partial conduction at institute level under the guidance of core faculty. The first day included presentations by Ar. Parul madam on concept of integration in design and Principles of Universal Design that sensitized students about the subject. In subsequent sessions experiential activities were conducted for the students where they actually used wheelchairs, cane sticks, blindfolds, earplugs and crutches to access various facilities within the campus. Students shared their experiences, discussed the issues and came up with the presentations for probable solutions.</p> <p>Second day educated the students about the Harmonized guidelines for barrier free design by Environment Ministry of Urban Department under Sugamya Bharat Abhiyan. End of the workshop was marked by a book reading session of the publication, N.A.S.I.K. by Ar. Parul Kumtha and her team. The book is based on the work done by the team on inclusive design proposals for the buildings in Nashik</p> <p>Based on the feedbacks received from Ar. Parul Kumtha, students worked on analysing, refining and value adding their proposals and preparing final reports.</p>
Outcome	<p>Students got introduced to the concept of integration in design and Principles of Universal Design. The experiential activities sensitised them towards the issues in conventional design that need to be addressed for inclusivity. They got different insights from the discussion sessions with Ar. Parul madam which helped them to take a holistic design approach towards the proposed solutions. The case studies in book reading session and the assignment, helped to know the practical implementation of inclusive design principles. It also shared</p>

Brief about the Program (Activity/Event)	<p>The certificate course on 'Sketching and rendering' in semester 1, was intended to develop the basic skills of sketching, rendering and perspective 3D drawing, using one, two & three point perspective methods. Easy perspective tricks were introduced to the students that helped them to draw 3D objects at any angle by understanding their structure, scales, proportions etc. Students also learnt to draw object shadows in perspectives. The knowledge was then applied to draw perspective drawings of simple building elements. Further basic rendering techniques were introduced to the students using various mediums. Students also learnt to draw proportionate human figures. The learnings of this course were implemented in developing perspectives of their architectural design problems and also to improve their presentation skills for the same. Step by step exercises were given to the students and evaluation was done.</p>
Outcome	<p>Students developed understanding of perspective and 3D drawing of objects, using easy tricks. They also learnt developing 3D drawings of simple building elements with sciography that will be useful to improve presentation of architectural drawings.</p>

Brief about the Program (Activity/Event)	<p>The certificate course on 'Sketching and rendering' in semester 1, was intended to develop the basic skills of sketching, rendering and perspective 3D drawing, using one, two & three point perspective methods. Easy perspective tricks were introduced to the students that helped them to draw 3D objects at any angle by understanding their structure, scales, proportions etc. Students also learnt to draw object shadows in perspectives. The knowledge was then applied to draw perspective drawings of simple building elements. Further basic rendering techniques were introduced to the students using various mediums. Students also learnt to draw proportionate human figures. The learnings of this course were implemented in developing perspectives of their architectural design problems and also to improve their presentation skills for the same. Step by step exercises were given to the students and evaluation was done.</p>
Outcome	<p>Students developed understanding of perspective and 3D drawing of objects, using easy tricks. They also learnt developing 3D drawings of simple building elements with sciography that will be useful to improve presentation of architectural drawings.</p>
Remarks	<p>Satisfactory.</p>

Brief about the Program (Activity/Event)	<p>A joint workshop on "Exploring Patterns" was conducted for the students of 1st year Architecture. It was conducted in consolidated manner extensively for consecutive 3 days.</p> <p>The joint Workshop was hosted in collaboration with Rachana Sansad Academy of Architecture, Mumbai. 39 students from AOA, Mumbai and 81 students from MVPS's College of Architecture, Nashik participated in the workshop. It was conducted under the guidance of Ar. Shripad Bhalerao, AOA, Mumbai, jointly with the First year Design team of both the colleges.</p> <p>First day started with introductory session by Ar. Bhalerao and Ar. Joel wherein they explained students about Fractal geometry. Then every student explored 2D geometric patterns and selected patterns were converted to 3D explorations using paper modelling. At end of the day 6, 3D explorations were identified for live scale installations in groups after discussions.</p> <p>Second day started with identification of appropriate sites for live size installations. A presentation by Ar. Recheal Mewada on bamboo as a sustainable construction material explained its properties, applicability in architecture and various bamboo explorations in architecture done by her team. The next session began with understanding joinery of metal, wood, bamboo, rope etc With respect to the prototype designed. Students began assembly</p>

	<p>and understand process and methods of assembly using sketches and trials.</p> <p>On third day students actually started erecting their live scale structures using chosen materials such as bamboo, corrugated sheets, plastic bottles, ropes etc. after a daylong extensive work installations were stabilized and completed. Exhibition of completed structures was visited and appreciated by professionals from the field. The workshop was concluded with a cultural event of flute playing, felicitation of students and guests from Academy of Architecture in the hands of Ar. Sanjay Patil.</p>
Outcome	The whole process made students understand how simple 2D geometric patterns can be explored to make forms that can be transformed into interesting 3D spaces. Students got hands on experience of working with different materials like bamboo, plastic, cardboard etc. to erect live size models. Overall it was an experiential and collaborative learning experience for the students.
Remarks	More such joint ventures need to be worked out in future.
