Brief about the Program (Activity/Event)	<p>On the occasion of World Mother Earth Day, Ar. Mili Majumdar delivered a lecture on 'Resilient and Sustainable planning: Strategies and key concepts in urban planning and buildings' wherein she sensitised students to global climate crisis and need of resilient and sustainable architectural practice. In her presentation she elaborated on the concept of resilience and its relevance to the field of architecture and sustainability. She also talked on the concept of adaptive design to reduce energy demand. Through her project demonstrations she explained how different tools like risk footprint report, climate assessment planning etc. can be efficiently used in resilient urban planning. Through simple graphics she explained strategies for resilient urban planning, sustainable storm water management, and mitigation of urban heat island effect, climate resilient housing design and energy efficient building design. Overall the session made students aware of the practical aspects and future prospects of sustainable architectural practice and green building design.</p>

Seminar Hospital Design

Our college has organised an online seminar for the T.Y.B.Arch. Students to study and understand the issues involved in functional planning of a hospital.

The seminar will cover the study of recent trends and changes in the healthcare facility needs and to evolve a document that can incorporate these changes so as to enable the architects to build hospitals in tune with modern requirements.

GUEST SPEAKERS

**Dr. Nilangi
Sardeshpande**

Ar. Milind Kulkarni

Ar. Ar. Dinesh Bhamre

Topic : Hospital Design

- **Date** : 16.03.2021
- **Time** : 8:10 a.m. to 3:30 p.m.
- **Google Meet joining info**

Brief about the (Activity/Event)	<p>A Seminar was organised by our college on Hospital Design for third year students. The programme was started with the Guidance to students for Seminar by Prof. Arpita Bhatt.</p> <p>Principal Dr. Prajakta Baste introduced the Seminar.</p> <p>Dr. Nilangi Sardeshpande gave an insightful presentation to help students in their design process.</p> <p>Dr. Nilangi explained how medical practice has changed from single handed practice to specialty to multispecialty to super specialty hospital and accordingly how allied setup has evolved. Also she touched upon who all are part of the caregiving after doctors to understand how allied staff also plays a role to run the hospital.</p> <p>Very important fact that Dr. Nilangi brought in was, how different patients get admitted into hospital differently, and explained how OPD, IPD, consulting rooms, waiting area outside operation theatre, ICU,OT Complex, Prayer room ,Rest rooms for doctors that gave very clear idea about how we as a designer should design spaces by understanding the users ,purpose and functions. At outset, it was a thoroughly informative session with a totally different perspective to design a space which can architecturally heal humankind.</p> <p>Ar. Milind Kulkarni with his presentation explained how to do horizontal as well as vertical zoning. Services, which is the very important and critical part of the hospital, also explained taking into consideration the height of the floor, structural grid, options like flat slab, inverted beams etc.</p> <p>He also shared his drawings to understand the complexity of service layouts.</p> <p>Ar. Dinesh Bhamre, through his projects, explained the layouts of hospitals. He also explained the requirements of each and every area with respect to services and segregations.</p>
Remarks	The activity was satisfactory. To be conducted next year.

NOTICE

All students of Second year B. Arch. are hereby informed that a workshop on '**Water supply and Drainage Layout**' has been arranged for them on 27th Nov. 2020 on Google meet.

MEP Consultant Ar. Rahul Londhe, the guest lecturer for this workshop, will present his project drawings and the students will then work on their individual layouts. The layouts will be discussed in the meet.

All the students must join this online workshop.

Details of the workshop are as follows

Day & Date: Fri. 27/11/2020

Time: 9.00 am to 3.00 pm (Lunch Break 1.00 pm-1.30 pm)

Google meet Link: <https://meet.google.com/opw-cyts-zkp>

Note: Students should keep their design project drawings for reference and Tracings, Drafting material ready with them.

Workshop on Water supply and Drainage Layout

Academic Year: 2020-21

Semester: I

Organized By :	Bachelor of Architecture
Objectives	To develop basic understanding of the terminology, techniques and methodology with specific reference to water supply and drainage layout .
Name of The Resource Person	MEP Consultant, Ar. Rahul Londhe
Resource Person Post and Organization	Chief Architect at Space Evolve Consultants
Date and Time	27/11/2020 6 Hours (9.00 am to 3.00pm)
Venue	MVPS's College of Architecture
Program In-charge	Prof. Sharmishtha Surajiwale
Students attended	Second Year B. Arch
No of Students Present	73 (Div. A + B)
Program Approved by	IQAC
Supporting Staff Members	Geetanjali Patil, Kiran Kadam, Tejas Pawar
Photograph/Video Available	Photographs available

Brief about the Program (Activity/Event)	<p>This workshop was arranged for second year students to introduce plumbing and drainage layouts.</p> <p>Stage 1 :</p> <ul style="list-style-type: none">• Assignment was introduced. The students need to design the water supply and drainage layout for their own design project of the previous semester, which was a Residence with an Attached Office Project. <p>Stage 2 :</p> <ul style="list-style-type: none">• MEP Consultant, Ar. Rahul Londhe discussed Plumbing layout. He presented his own project drawings to explain the layout.• Topics discussed in the presentation were Individual toilet detailing, Site detailing and Campus drainage layout.• After the presentation, students worked on the layouts.• The layouts were then discussed in the session. Feedback was given and a number of revisions were done in the layout in consecutive discussions. <p>Stage 4 :</p> <ul style="list-style-type: none">• After a number of revisions, students reached a technically right, workable, economical user convenient water supply and drainage layout.
Remark	<ul style="list-style-type: none">• Through this workshop, Students got guidelines to design Water supply and Drainage Layout for a building project.

NOTICE

DATE : 01/12/2020

No	DAY	DETAILS
1.	24.10.2020	
	9.00 a.m.	a) Heat load concepts in brief with cooling load estimation. b) Duct sizing c) Air conditioning layout design.
2.	03.12.2020	
	3.00 p.m.	Discussion on students' work and queries. Representative works will be presented and discussed.

Dear all, in view with the time availability of guest and progress of your work on air conditioning design tutorial, the second session of interaction with Mr. Baliga sir has been rescheduled on 3rd Dec 2020 at 3.00 p.m. You are instructed to be ready with your work for discussion and queries if any. Link for the session will be shared shortly.

The modified schedule of sessions is as follows:

Important Note :

Since the Aim, Objectives, and the Content of both the Guest Sessions for Div A and B (Lectures & Studios) is same (with probable variations up to 15 %), it is not compulsory for students to attend both the Guests.

Although, for practice & self-study purpose, students are allowed to voluntarily attend both the Guests if they wish.

NASHIK
CHAPTER

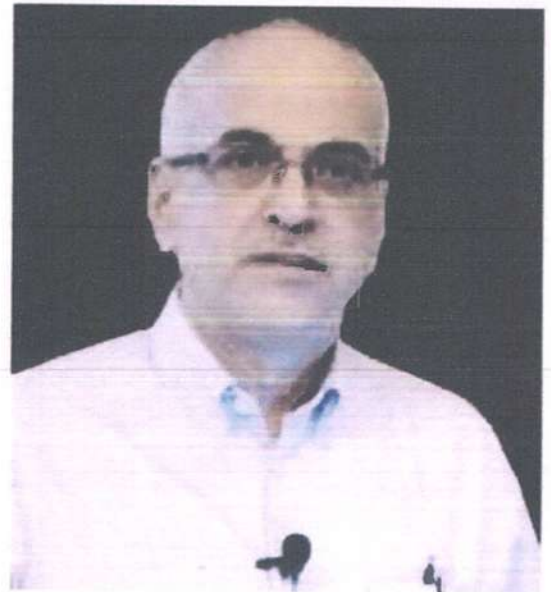

In collaboration with

Indian Society of Heating, Refrigerating and Air Conditioning Engineers, Nashik Chapter

Organizes a webinar on

AIR CONDITIONING DESIGN FOR ARCHITECTS For 3rd year B.Arch students

Mr.B.Gautham Baliga is director at OPAL HVAC Engineers Pvt Ltd, Mumbai, a company which specializes in pharmaceutical, healthcare and industrial HVAC systems. He is also a partner at R.S. Kulkarni HVACR Consulting Engineers, Pune. He is a graduate mechanical engineer from IIT Kharagpur. He is an active member of ISHRAE. He is currently Chair for the Healthcare TG [Technical Group] which has been tasked with coming out with Guide for HVAC for Healthcare Facilities this year. He has been a member of the ISHRAE task force to write the recommendations for Covid mitigation in workspaces.

**MR. B. GAUTHAM
BALIGA**

24 TH AND 31TH OCTOBER
2020 SATURDAY AT
9.00 A.M

The webinar will cover following aspects from architectural design point of view :

- Heat load concepts in brief, cooling load estimation
- Technical and design aspects of duct sizing
- Air conditioning layout design

Brief about the Program (Activity/Event)	<p>As a curricular requirement under the subject 'Building Services -III' for third year B. Arch course, the workshop was organised in collaboration with ISHRAE Nashik chapter for participatory learning on air conditioning design from architectural point of view. On day one Mr. Baliga gave a detailed presentation covering heat load concept, cooling load estimation and duct sizing. Through his own project drawing demonstrations he elaborated on practical aspects of air conditioning layout design and architectural considerations for the same.</p> <p>Day two was an interactive session wherein representative works of students for cooling load estimation, duct sizing and layout design were keenly examined and discussed upon by Mr. Baliga. He solved students' queries and gave valuable inputs to have more practical solutions and improvements in their works.</p> <p>Students actively participated in the discussions for better resolution of their layouts. Overall the session helped students to have understanding of basic concepts for the topic in a more practical way, thereby helping to bridge the gap between academics and industrial approach towards the topic.</p>
Remarks	Feedbacks from experts on student's work helped better understanding of the details.

Brief about the (Activity/Event)	<p>A guest lecture series was arranged as a part of the fourth year electives programme under advanced landscape electives. The intention of the series was to expose students to 'Landscape architecture' as a field of specialisation and practice and avenues available further.</p> <p>Architect Saumya Sampat explained his journey through various scales and complexities of projects he handled while interning under Master landscape architect Prof. Mohammed Shaheer and further ahead. He elaborated the patience and dedication required in the field. With diverse exposure from historic landscapes, parks and housing complexes, he associated with a Singapore based MNC – One Architecture to further explore landscape avenues with environmentally sensitive and multi crore projects in Kolkata.</p>
	<p>He emphasised on the need for further education after gaining relevant sufficient experience, as he pursued his masters in Sheffield University, UK and now works as a senior landscape architect with Andy Sturgeon Landscape and garden design, London, UK.</p>
Remarks	<p>The students understood the avenues available in landscape architecture as a specialised career through Architect Saumya's journey.</p>

BY: AR. PRASHANT SHIRDIYAT

Harmandir Sahib, also known as the Golden Temple, is the holiest Sikh religious site in India. It is a prominent symbol of Sikhism and is located in Amritsar, Punjab, India. The temple is a masterpiece of Sikh architecture and is surrounded by a large pool of water. The temple is a symbol of peace and harmony and is a source of inspiration for people of all religions.

The garden is located between the large lands and the main pool of water. Much like the concept of Harmandir Sahib, it was important that the garden enclosed the idea of sustainability. It needed to become a space with the ability to provide multiple experiences.

VERTICAL LANDSCAPE

Vertical landscapes are areas of vegetation growing directly on the facade of a building or on separate structural systems. They are usually made up of modular units, repeated most commonly in vertical sections. In structural walls or frames, in general, they are vertical planting systems used on the inside wall or on the exterior of buildings. They are engaged by either closed or open drainage systems to minimize water consumption.

Vertical landscapes are aesthetically pleasing and sustainable, and they contribute to the greening of urban settings. By utilizing vertical surfaces, they provide space for commercial and office areas, parks and public facilities, educational and healthcare buildings, and housing (including senior care) and are being installed on a wide variety of buildings and their surroundings.

SUSTAINABLE LANDSCAPING

A sustainable landscape is one that considers the environment in its development. It requires only what is naturally available and does not require artificial support. It is self-sustaining during periods of low rainfall or during periods of high rainfall. It is designed to be weather-resistant and weather-resistant. It is designed to be weather-resistant and weather-resistant.

The landscape is designed to be weather-resistant and weather-resistant. It is designed to be weather-resistant and weather-resistant. It is designed to be weather-resistant and weather-resistant.

Fourth year b. arch 20-21
Guide : Ar. Nandan Malani

One of the most important first moves was the extension of River Street through the site to reconnect the park to the city and to deepen a sense of publicness rather than a perception of a private front lawn for new development. Designed as a city street, River Street also significantly improves east-west connections between the upland and the waterfront, eliminating the need for stairs and ramps and increasing the park's accessibility.

Site : Goda park
Bajipool Nashik

Site Selection

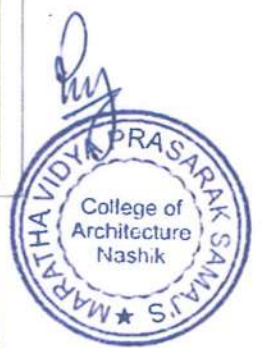

The site is near gangapur road adjacent to gogawan river. The site is located in the core of nashik city connecting the prime areas of nashik and also having connectivity with the nearby destinations.

The site in length is 500 m. The site is surrounded by open plots, hotels, residence and water body.

Prevailing winds are from north south and westerly winds from waterbody.

Brief about the (Activity/Event)	<p>A guest lecture series was arranged as a part of fourth year electives programme under advanced landscape electives. The intention of the series was to expose student to 'Landscape architecture' as a field of specialisation and practice.</p> <p>Architect Shurti Humane explained few of her landscape projects from conception to manifestation. She elaborated on the design process that responded to site context, climate. She explained how concepts needs to percolate to the last level of details from material selections, paving patterns and planting palette selection to compliment the concept.</p> <p>It was important to understand that the involvement of landscape architect is right from the first site visit in on architectural visualisation of project.</p>
Remarks	Students were keen to explore the hand in glove approach to Landscape practice alongside architectural visualisation.

RAVINDRA BHAN AND ASSOCIATES

ARCHITECTS LANDSCAPE ARCHITECTS AND ECOLOGICAL PLANNERS

Prof. Ravindra Bhan is a pioneer in the field of landscape architecture in India. He started his architectural education in a school of planning and architecture in New Delhi but left formal architectural studies to work with Dr. A. P. Kanwade. He participated in the first urban master planning strategy of Delhi and the very first Yamuna Riverfront Development plan. He then went on to work with Architects Co-Partnership in England and later to Finland with the famous Architect A. Taimo Penttila. He completed his formal architectural education with a B.Arch from Washington University, St. Louis, Missouri, U.S.A. and Masters in Landscape Architecture from University of Pennsylvania, U.S.A.

Some of the projects include Shakti Scheme - Memorial for late Prime Minister Indira Gandhi, Development plans of Anandya Ghats, Master planning and site development for Nandurda Seminar, Anandya Ghat, Housing for HUDCO - Urban design and landscaping with Design of 100 units, Landscape design for Khandola Beach Resort, Shughal Shander Hotel in Agre to name a few.

He was awarded the Aga Khan Award for architecture and landscape architecture in 1980 which is a prestigious international award for small architects. He was Professor and head of Department of Landscape Architecture school of planning and architecture, New Delhi, 1972-76 and has also lectured in University of Pennsylvania & Washington University.

12

NEED OF PROJECT

These Parks will provide vital opportunities for contemplation and enjoyment of nature and scenery, for organized sports and spontaneous play, for civic rituals and cultural events, and for education and research.

1. As site has immediate road access on two sides
2. Existing vegetation forms a buffer from the road fronts and will play an important shading device
3. Due to residential areas human intervention will be more
4. The site can be converted into a highlighted space in its area
5. And this will create a well planned livable community
6. That part will bring life to the surrounding which will act as recreational buffer zone between the buildings.

DESIGN SOLUTION

1. **Nature** - To put a lot of nature in your park - we will have to plant a myriad of trees, at least a pond or two and a ton of fresh grass. If we can't get the ponds, we'll make up for it in more green grass. People love to lay around in the grass, especially in urban areas. But we have to make sure that whatever nature we have, we have to take care of it. Nobody likes to see yellowed patchy grass, dead flowers, or an ugly colored pond.
2. **Seating** - Just because we have a wide expanse of grass, that doesn't mean we should only have those seating options. Whether we choose aluminum sports bleachers or park benches, we need to make sure that we give visitors a lot of seating choices. People choose parks as places to reconnect with friends, families, and even strangers. Providing seating options helps create a welcoming atmosphere throughout your park.
3. **Play Equipment** - Another pretty obvious element of a public park is play equipment. Every prosperous park offers various equipment for play. However, we have play equipment that supports kids' full range of play. The most important things we can do for our public park is ensure there's plenty of play equipment and the equipment is in good condition. From different sport items to swing sets and splash pads, the more we include, the wider audience we'll draw in - just make sure you don't try to squeeze too much in.
4. **Park Security** - A necessary component we don't want to forget is park security. If people don't feel safe about park, they won't come to it. Of course, having a bunch of security officers strolling the park doesn't make people feel very comfortable either, we need to do our best to find a happy medium.
5. **Wayfinding** - We need to make sure we have a wayfinding system in place. We need a variety of paths and signs to make it easy for people to navigate the park. It's difficult to implement a wayfinding system in a park, but even a well maintained park with paths around the perimeter can be a chaotic mess if we have more than one path.

NOTICE

Date- 26 Oct. 2020

We are privileged to have HVAC engineer Mr. Sachin Save on 25 SEP & 29 SEP 2020. He is the Technical Director at "VENTUS AIRCONDITIONING PVT. LTD. Nashik"

Ventus Airconditioning Pvt. Ltd. are the Authorized Dealers of Daikin Air-Conditioning India Pvt. Ltd. They design & provide HVAC Solutions for various building typologies at various scales – from Commercial & Institutional buildings to Private Bungalows.

Mr. Sachin Save will be with us as a Guest Lecturer for two Sessions as follows –

SESSION 1 : 28 OCT 2020

Lecture 1 Topic :	HVAC Systems and Architectural Design
Studio Exercise 1 :	System Selection and Sizing Calculations

SESSION 2 : 04 NOV 2020

Lecture 2 Topic :	Air Distribution and Ducting Design
Studio Exercise 2 :	HVAC System & Ducting Layout

Workshop HVAC system design & air distribution

Academic Year: 2020-21

Semester: I

Organised By	MVPS's College of Architecture
Objectives	<ul style="list-style-type: none">To study/understand Calculation of A.C. loads and Air distribution systems, ducts and ducting layouts, space requirement, integration of A.C. system in design
Name of Resource Person	Er. Sachin Save.
Date and Time	28.10.2020 , 9:00am to 1pm & 4.10.2020 , 9:00am to 1pm
Venue	On line
Student attended	T.Y.B.Arch.
No of Students Present	60 nos.
Program Approved by	Principal Dr. P.B.Baste
Supporting Staff Member	Ar.Hemant Thakare, Ar.Megha Butte.
Photograph/Video Available	Photographs available
Brief about the (Activity/Event)	<p>A Workshop was organised by our college on HVAC system design & air distribution for third year students. The programme was started with the Guidance to students for workshop by Prof. Hemant Thakare.</p> <p>Er. Sachin Save sir started his lecture by explaining why architects should care about HVAC and what does HVAC engineers expect from architects.</p> <p>He explained the HVAC system selection criteria & system design criteria for a project and non -conventional A.C. Certification bodies: IGBC, LEED, Griha, Credai & ICC & their work was explained.</p> <p>By giving the examples of projects, Save sir explained how to calculate heat load for an area and what the methods to calculate buildings heating are and cooling loads. Air distribution, types of ducting system, static pressure calculations, where to place A.H.U.? ducting layout, air distribution system components and how to calculate the size of duct was also explained by him.</p> <p>Students then calculated the heat load calculations of their own design and also found the solution of ducting layout of A.C. system.</p>
Remarks	The activity was satisfactory. To be conducted next year.

NOTICE

DATE : 03/09/2019

This is to inform all the third year B.Arch students (Div A and B) to remain present for the '**Air Conditioning Design Workshop**' that is to be conducted on 4th, 11th and 18th of September 2019 from 8.00 a.m. to 11.30 p.m. per day. The expert conducting the said workshop is Er. Suresh Didmishe from Indian Society of Heating, Refrigerating and Air Conditioning Engineers (ISHRAE), Nashik Chapter.

BUILDING SERVICES – III (2019-20)

Guest Speaker: Er. Suresh Didmishe

TENTATIVE SCHEDULE OF SESSIONS

1st Module: Date: 4 SEP 2019

Part 1 – **“Architects, Architecture, Sustainability, and HVAC System Design”**

- Lecture & Presentation (*supplemented with project photographs*)
- Q.–Ans. Session / Discussion
- Introduction to the Homework / Journal Assignment
(*Write notes in the Essay format or Questionnaire format*)

Part 2 – **System Selection & Sizing : Numerical & its application in to HVAC Design**

- Conducting the Group Assignment
(*Groups of 4 students will design HVAC for the previous semester project*)

2nd Module: Date: 11 SEP 2019

Part 1 – **“Architect’s roll in HVAC System Design”**

- Lecture & Presentation (*supplemented with project photographs*)
- Q.–Ans. Session / Discussion
- Introduction to the Homework / Journal Assignment
(*Write notes in the Essay format or Questionnaire format*)

Part 2 – **Ducting Design & Numerical**

- Conducting the Group Assignment
(*Groups of 4 students will do the Duct Sizing Numerical for the same group project*)

3rd Module: Date: 18 SEP 2019

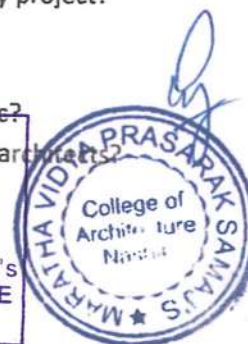

- Discussion on worked done with the expert and query solving

Questionnaire:

1. Why is HVAC important?
2. Why Architects & Interior Designers should care about HVAC?
3. What does HVAC engineers expect from Architects?
4. How HVAC is a new Opportunity for Architects?
5. What’s the future of HVAC? & How will it affect Architectural profession & practice?
6. What architects can do to integrate HVAC & mechanical systems into design process itself?
7. Which other consultants must be part of the project at design stage itself?
8. What are the methods to calculate the building’s heating / cooling loads?
9. What are the HVAC ‘System Selection Criteria’ & ‘System Design Criteria’ for any project?
10. What is mean by Non-Conventional HVAC systems & What are they?
11. How costly & efficient & durable are non-conventional systems?
12. What kind of softwares are used for HVAC system design, energy simulation, etc?
13. What additional knowledge / training / certifications are recommended to the architects?
14. What is IGBC, LEED, Griha, Credai, ICC, etc?
15. What is the ideal way of doing Market Surveys to upgrade self knowledge?

Brief about the Program (Activity/Event)	<p>As a curricular requirement under the subject 'Building Services -III' for third year B. Arch course, the students are expected to learn the technical aspects of air-conditioning system design for their Architectural design projects. Considering the technical depth of the topic, recent advancements and the gap between theory and practice of AC design, we in collaboration with ISHRAE (Indian Society of Heating Refrigeration and Air Conditioning Engineers), Nashik Chapter had organised a three half days workshop for the students. The expert sessions were conducted by Er. S. M. Didmishe Nashik. The sessions conducted added on the understanding of basic concepts of the students for the topic in a more practical way. It also helped bridging the gap between academics and industrial approach towards the topic. The knowledge imparted equipped the students for a healthier working with the HVAC Consultants for their design projects that has become a need of time with the implementation of ECBC (Energy conservation building codes) 2017 in the state of Maharashtra on the background of global warming. Students also got a chance to interact with various resource persons from ISHRAE. ISHRAE established in 1981 aims at awareness and technical education in the science of HVAC through lectures, presentations, workshops, product presentations, publications and expositions. It consists of over 12000 HVAC & R industry members and over 75000 student members, 41 chapters spread in various cities all over the country.</p>

Sub: Workshop on 'AIR CONDITIONING DESIGN'.

Respected Madam,

As a curricular requirement under the subject 'Building Services -III' for third year B. Arch course, the students are expected to learn the technical aspects of air-conditioning system design for their Architectural design projects. Considering the technical depth of the topic, recent advancements and the gap between theory and practice of AC design, we in collaboration with ISHRAE (Indian Society of Heating Refrigeration and Air Conditioning Engineers), Nashik Chapter had organized a three half days workshop for the students. The expert sessions were conducted by Mr. S. M. Didmishe, CWC Member ISHRAE, Nashik. Mr. Didmishe has been working in the field of HVAC Consulting since around 40 years. He is BE (Mechanical) with Specialization in Refrigeration & Air conditioning, PGD(Post Graduate Diploma) in HVAC. He is also a Certified Energy Auditor by BEE (Bureau of Energy Efficiency). Following are the details of the workshop:

Program

No	DAY	CONDUCT	DETAILS
1.	04.09.2019		
	Morning 8:00am to 11:30 am	Theory	Principles of AIR CONDITIONING load estimation, Sustainability and Energy Conservation in AC Design, System selection, Basic terminologies, unit's conversions, Concept of cooling load, Method of cooling load estimation.
2.	11.09.2019		
	Morning 8:00am to 11:30 am	Theory and hands on assignments	AIR CONDITIONING duct designing – Duct basics, factors affecting duct system design, classification of duct system, Air Distribution system and its components, Concept of aspect ratio and pressure in a duct, Components of ducting, Do's and Don'ts of Ducting, Detailed considerations and methods of duct design referring to the standards.
3.	18.09.2019		
	Morning 8:00am to 11:30 am	Theory and hands on assignments and individual layout discussions	Discussion on queries in heat load estimation by the students. Duct sizing using equal friction method, concept of pressure drop etc. Hands on exercises on duct sizing Duct design layout illustrations. Discussion on individual design project for ducting layout.

NOTICE

Date- 22 .9. 2019

We are privileged to have HVAC engineer Mr. Sachin Save on 25 SEP & 29 SEP 2019. He is the Technical Director at "VENTUS AIRCONDITIONING PVT. LTD. Nashik"

Ventus Airconditioning Pvt. Ltd. are the Authorized Dealers of Daikin Air-Conditioning India Pvt. Ltd. They design & provide HVAC Solutions for various building typologies at various scales – from Commercial & Institutional buildings to Private Bungalows.

Mr. Sachin Save will be with us as a Guest Lecturer for two Sessions as follows –

SESSION 1 : Date: 25 SEPT 2019

Lecture 1 Topic : HVAC Systems and Architectural Design
Studio Exercise 1 : System Selection and Sizing Calculations

SESSION 2 : Date: 29 SEPT 2019

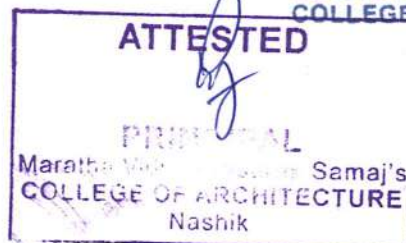

Lecture 2 Topic : Air Distribution and Ducting Design
Studio Exercise 2 : HVAC System & Ducting Layout

Dear Sir,

On behalf of our institute, I would like to invite you as a guest speaker on the topic of your expertise.

In the 3rd Yr. of "B-Arch" Course, we teach students about -

Mechanical Ventilation and Air-Conditioning systems; under the Subject - Building Services III.

I believe in this pandemic situation and online Teaching-Learning environment, you are well equipped to guide our students with proper knowledge w.r.t. the post-covid scenario in HVAC and Building Design and Construction Industry.

Please kindly receive the attached Schedule for the Lectures & Studio Assignments.

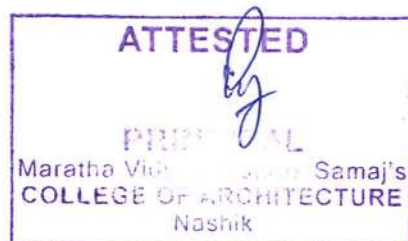

We are open to your suggestions & for improvising the same.

Thanking you,

Sincerely,

Ar. Hemant Thakare

M. V. P. Samaj's College Of Architecture , Nashik.

Organizes a webinar on

HVAC SYSTEM DESIGN & AIR DISTRIBUTION
3rd Yr. Bachelor of Architecture

We are privileged to have with us, HVAC engineer Er. Sachin Save.

He is the Technical Director at "Ventus Air-conditioning pvt. Ltd. Nashik" Ventus Air-conditioning Pvt. Ltd. are the Authorized Dealers of Daikin Air-conditioning India Pvt. Ltd.

Er. Sachin Save

Er. Sachin Save design & provide HVAC Solutions for various building typologies at various scales from Commercial & Institutional buildings to Private Bungalows.

The webinar will cover following aspects from architectural design point of view

1. HVAC Systems & Architectural Design.
2. Air Distribution & Ducting Design.

	<p>He explained the HVAC system selection criteria & system design criteria for a project and non-conventional A.C.</p> <p>Certification bodies: IGBC, LEED, Griha, Credai & ICC & their work was explained.</p> <p>By giving the examples of projects, Save sir explained how to calculate heat load for an area and what the methods to calculate buildings heating are and cooling loads. Air distribution, types of ducting system, static pressure calculations, where to place A.H.U. The ducting layout, air distribution system components and how to calculate the size of the duct was also explained by him.</p> <p>Students then calculated the heat load calculations of their own design and also found the solution of ducting layout of A.C. system.</p>
Remarks	The activity was satisfactory. To be conducted next year.

Name of Program : **B-Arch**
Title of Activity : **Workshop on 'Infrastructure availability
in Urban-Rural Fringe Areas of Nashik'**

Academic Year :2018-19

Organised By	Bachelor of Architecture
Objectives	<ul style="list-style-type: none">• To enable students to undertake research focussed on the issue related to the Rural Environment.• Preparation for the Field Survey & Data Assimilation.• Organization of the Survey Questionnaire.• To examine, simplify, & organize the information in the form of Data Tables, Graphs, & Pie Charts.• Presenting the Design Solutions / Proposals in a specific format
Resource Person	Mr. Avinash Patil
Resource Person Post and Organization	Secretary, Urban Development. Dept. Govt. of MH
Date and Time	23/12/2018 8:00 am to 7:00 pm
Venue	3 Villages within the Fringe Areas of Nashik City 1) Girnare, 2) Samangaon 3) Nandurshingote
Program In-Charge	Fourth Year B-Arch Faculty of – Research in Architecture and Urban Design
Student Attended	Fourth Year B-Arch
No of Students Present	47 Students
Program Approved by	Extension and Social Services Committee
Supporting Staff Member	Faculty of "Research in Architecture" 4 th Yr B-Arch

Brief about the Program (Activity/Event)

Based on the workshop conducted by Mr. AvinashPatil, a Field Survey was planned to study the existing infrastructure in the 3 villages from the Rural-Urban Fringe areas of Nashik; for Urban Development Dept. Govt. of Maharashtra.

Before going to actual sites, students prepared an extensive Questionnaire for the same. Infrastructure such as road connectivity, water supply, waste disposal system, primary health center, electricity supply, etc. are to be surveyed. 50 sample cases are interviewed. The analysis was done w.r.t. individual village, data matrix is generated using the findings from the Questionnaires and facts were presented through bar graphs & pie charts.

<p>Brief about the Program (Activity/Event)</p>	<p>Every year workshop topics are identified to value add the course curriculum under various subjects. Efforts are taken to call the experts from the field to conduct the workshop. Activities based on the workshop learnings such as assignments, analytical studies, field visits, surveys etc. those are needed to achieve the workshop outcomes, are undertaken during lectures allotted for institute philosophy for the respective year which are over and above the stipulated time for the respective subject conduct. The workshop on streets for people was conducted by 'Institute for Transportation and Development Policy (ITDP), India' for fourth year B. Arch students, subject of Research in Architecture, under the Institute Philosophy – "Learning by Doing". The workshop was conducted in composite manner with partial conduction by expert and partial conduction at institute level under the guidance of core faculty. It is a step towards the betterment of Indian Urban streets by designing them to encourage non-motorized and public transport by meticulously analyzing the patterns of street usage by people in response to factors like availability of footpaths, shading on streets, lighting provisions, vehicle speed, amenities, safety, user friendliness and many more. Students surveyed the identified main streets within the Nashik city and mapped the observations. After analyzing the same, street design proposals were generated under five parameters of walkability, parking, footpaths, crowd streets mapping and building use. ITDP being an advisory body for the local authorities, the proposals thus generated are aimed to be presented to the Municipal Corporation, Nashik in the form of street design guidelines for further development and execution. The work was also exhibited at various locations for public by Lokmat Nashik First.</p>

Brief about the Program (Activity/Event)	<p>On day one, brief presentations were delivered to the students to understand the concept of green buildings, their criteria and compliance measures under different variants as prescribed by GRIHA. The variants included sustainable site management, water efficiency, sustainable materials use, energy efficiency, renewable energy use etc.</p> <p>On the second day, interactive sessions on human comfort and day lighting in buildings were organized wherein exercises were conducted on methods of calculating day lighting in buildings and generating shading device design options by the students for different façade orientations. The workshop culminated in working on green building measures for the given architectural project and detailed discussions on the same. Thus, the workshop was a step forward for the students to understand practical applications of green building concepts in architectural design.</p>
Remarks	Possibilities implementing the learnings could be explored in ongoing design problems with involvement of experts for more duration.

A report on Workshop on Climate Responsive Architecture by Prof. S.L. Kolhatkar

Academic Year : 2016-17

Semester : I

Organised By	Bachelor of Architecture
Objectives	<ul style="list-style-type: none">• To understand in detail, various scientific tools and techniques useful in assessing climatic parameters for a particular site.• To understand passive strategies for climate responsive building design with application details.• To encourage students to take a climate responsive design approach in the very initial stage of their design problem.• To gain knowledge pertaining to the institute's philosophy.
Name of Resource Person	Prof. S.L. Kolhatkar
Resource Person Post and Organization	Bharati Vidyapeeth college of Architecture, Pune
Date and Time	27/07/2016, 28/07/2016 (14 hrs) 8:00 am to 3:00 pm
Venue	MVPS's College of Architecture
Program In-Charge	Prof. Suruchi Randive and Prof. Sanjeev Patil
Student Attended	Third and Fourth Year B. Arch Students
No of Students Present	62
Program Approved by	ADC
Supporting Staff Member	Prof. Sanjeev Patil, Prof. Ketaki Joshi, Prof. Gitanjali Patil
Photograph/Video Available	Photographs and video available

Brief about the Program (Activity/Event)	<p>A 2 day workshop on Climate Responsive Architecture was conducted by prof. Kolhatkar. On the first day of this workshop, Prof. Kolhatkar explained in detail various scientific tools and techniques such as sundial, sun path diagram, wind rose, psychrometric chart, bio climatic chart etc. useful in assessing climatic parameters like sun, wind, radiation, humidity, sky condition etc. for a particular site. These tools are of great use for taking important decisions in the design process such as sitting, orientation, massing, envelope design, material use, energy conservation measures etc. On the second day, in his presentation he further went into the details of various climate responsive strategies such as evaporative cooling, thermal mass, roof insulation, night ventilation, passive cooling, natural ventilation etc. along with their application details. In these two days extensive sessions students got the in-depth and scientific knowledge of the subject that helped them to take a climate responsive design approach in the very initial stage of their design problem.</p>
Remarks	Duration of the workshop could be increased. Second year students could also be benefitted.

Brief about the Program (Activity/Event)	<p>During his visit Ar. Prasanna Desai had a rigorous discussion with 4th year architecture students on the subject of Housing design. Selected students' works on their housing design project were showcased to get expert comments and suggestions from the guest. Further the students had a free dialogue with sir to understand the intricacies of the housing design process. Desai sir also had a discussion with 4th year Design faculty that greatly helped them to have better output from the students.</p> <p>In the evening session Ar. Desai had a presentation on 'Housing – The quality of Environment' in which he discoursed his views on issues such as quantity, affordability and quality of housing in India. He showcased his own projects and shared his work experiences. He explained linking of private space to public space through achieving comfort, flexibility, extended unit, expansion, network, open space hierarchy and amenities as a key to achieve good environment quality in housing. In his next presentation, 'Delhi o Dehli', he explored the contemporary architecture of Delhi.</p> <p>Next day, first year students interacted with Ar. Desai. The interaction helped students a lot to understand the qualities of an architect. Thus, Ar. Desai's visit to the institute proved to be a very valuable and knowledgeable experience for the students as well as the faculties.</p>
Remarks	Proved helpful for fast learners and slow learners got encouraged.

Nature of Photo Submission (Soft/Hard)	Soft
Brief about the (Activity/Event)	<p>A national conference on 'Urban regeneration – a new perspective to heritage conservation' at our institute on 16th and 17th February 2017. The conference is aimed at brainstorming this new dimension of heritage conservation – urban regeneration. Indian cities are bestowed with diverse built and cultural heritage that give them a strong sense of belonging. With urbanisation pressures, old core areas of cities provide opportunity for this regeneration activity and conservation of historic buildings and environs remains prime focus of such an endeavour.</p> <p>The conference will try to identify and discuss issues related to development and implementation of such projects. Broad themes for discussion and presentation include redesigning of core areas for modern needs, government policies, rules and regulations, financial feasibility and management and community participation.</p>

Dear Sir,

On behalf of our institute, I would like to invite you as a guest speaker on the topic of your expertise.

In the 3rd Yr. of "B-Arch" Course, we teach students about –

Mechanical Ventilation and Air-Conditioning systems; under the Subject – Building Services III.

I believe in this pandemic situation and online Teaching–Learning environment, you are well equipped to guide our students with proper knowledge w.r.t. the post-covid scenario in HVAC and Building Design and Construction Industry.

Please kindly receive the attached Schedule for the Lectures & Studio Assignments.

We are open to your suggestions & for improvising the same.

Thanking you,

Sincerely,

Ar. Hemant Thakare

Subject: Invitation for conference on 'Urban Regeneration – A New Perspective to Heritage Conservation'

To: "debashish.nayak@ahduni.edu.in" <debashish.nayak@ahduni.edu.in>

Cc: Prajakta Baste <psbaste@gmail.com>, Geetanjali Patil <geetashri@gmail.com>, Suruchi Ranadive <suruchiranadive@gmail.com>

Respected Debashish Nayak Sir,

Greetings from MVP Samaj's College of Architecture, Nashik.

We are hosting a conference on '**Urban Regeneration – A New Perspective to Heritage Conservation**' at our institute on 16th and 17th February 2016. The conference is aimed at brainstorming this new dimension of heritage conservation – urban regeneration. Indian cities are bestowed with diverse built and cultural heritage that give them a strong sense of belonging. With urbanization pressures, old core areas of cities provide opportunity for this regeneration activity and conservation of historic buildings and environs remains prime focus of such an endeavour.

The conference will try to identify and discuss issues related to development and implementation of such projects. Broad themes for discussion and presentation include re-designing of core areas for modern needs, government policies, rules and regulations, financial feasibility and management and community participation.

As per our telephonic conversations we would like you to present your thoughts and ideas at the conference as one of the key speakers on 16th February in Session 2. I take this opportunity to invite you for the event and request you to share your valuable knowledge with us.

Kindly convey the topic of your presentation and let us know your travel plans so that the flight bookings can be done at the earliest.

The broad outline for the 2 day conference is as follows

Day 1 16th Feb
Session 1 Dr Shikha Jain
Session 2 Debashish Nayak
Session 3 Ar Rahul Chemburkar
Day 2 17th Feb
Session 1 Ar Kiran Kalamdani
Session 2 Dr Benny Kuriakose

Thanking you
Convenor
Dr Prajakta Baste.
Principal, MVP Samaj's College of Architecture
Nashik.

 Please let me know if you require any further details.

Profile

Benny started his career in 1984 and received the basic lessons in architecture under the tutelage of Laurie Baker. After receiving the Charles Wallace India Trust award for an MA in conservation studies at the University of York. He has received his doctorate from the Indian Institute of Technology, Madras

Benny is known more for his work for the design of the public buildings and the transplanted of the buildings in the Kerala Section of the craft village known as Dakshinachitra in Chennai. Recent architectural works include the Muziris Heritage Project, The Springdale Heritage Resort in Vandiperiyar, the design of the tsunami affected villages of Chinnangudi and Tarangmbadi in Nagapattinam District and the Harishree Vidyalaya School in Chennai.

Benny has authored the book 'Conserving Timber Structures in India' and one of the editors for the book 'Guidelines for the Preparation of a Heritage Management Plan'. He has offered his services as consultant to UNDP, various State Governments and other organizations.

Title

Sustainability of Built Environment Through Heritage & Conservation

History, conservation and heritage can be linked with development and they can form potential resources and assets for promoting non-formal education and tourism. The focus should be on the local economy generating local employment, promoting traditional industries, art and craft activities. Tourism and heritage management are integrated in this approach. One of the mistakes made in the case of some of the cultural tourism projects is the lack of co-ordination between the tourism administrators and the custodians of monuments. Economic value of heritage, which is sustainable, is important for the state of Kerala.

Ancient Kerala, renowned as the spice coast of India, was a major hub in the spice route trade, between South East Asia, Africa, Arab States and even Europe. At the centre of this spice trade was for centuries the ancient port of Muziris that has a history of 3000 years. The presentation will focus on the Muziris Heritage Project of the Government of Kerala as a case study.

Respected Benny Kuriakose Sir,

Greetings from MVP Samaj's College of Architecture, Nasik.

We are hosting a national conference on '**Urban Regeneration – A New Perspective to Heritage Conservation**' at our institute on 16th and 17th February 2016. The conference is aimed at brainstorming this new dimension of heritage conservation – urban regeneration. Indian cities are bestowed with diverse built and cultural heritage that give them a strong sense of belonging. With urbanization pressures, old core areas of cities provide opportunity for this regeneration activity and conservation of historic buildings and environs remains prime focus of such an endeavour.

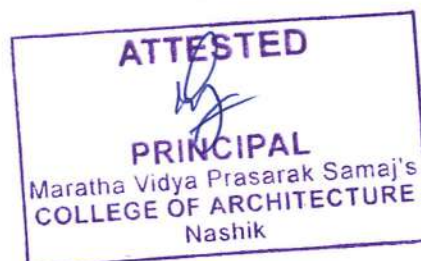

The conference will try to identify and discuss issues related to development and implementation of such projects. Broad themes for discussion and presentation include re-designing of core areas for modern needs, government policies, rules and regulations, financial feasibility and management and community participation.

As per our telephonic conversations we would like you to present your thoughts and ideas at the conference as one of the key speakers on 17th February in Session 2. I take this opportunity to invite you for the event and request you to share your valuable knowledge with us.

Kindly convey the topic of your presentation and let us know your travel plans so that the flight bookings can be done at the earliest.

The broad outline for the 2 day workshop is as follows

Day 1	16th Feb
Session 1	Dr Shikha Jain
Session 2	Debashish Nayak
Session 3	Ar Rahul Chemburkar
Day 2	17th Feb
Session 1	Ar Kiran Kalamdani
Session 2	Dr Benny Kuriakose

Dear Sir,

On behalf of our institute, I would like to invite you as a guest speaker on the topic of your expertise.

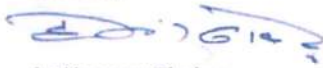

In the 3rd Yr. of "B-Arch" Course, we teach students about –
Mechanical Ventilation and Air-Conditioning systems; under the Subject – Building Services III.

I believe in this pandemic situation and online Teaching–Learning environment, you are well equipped to guide our students with proper knowledge w.r.t. the post-covid scenario in HVAC and Building Design and Construction Industry.

Please kindly receive the attached Schedule for the Lectures & Studio Assignments.
We are open to your suggestions & for improvising the same.

Thanking you,

Sincerely,

Ar. Hemant Thakare

Subject: Invitation for conference on 'Urban Regeneration – A New Perspective to Heritage Conservation'
To: "debashish.nayak@ahduni.edu.in" <debashish.nayak@ahduni.edu.in>
Cc: Prajakta Baste <psbaste@gmail.com>, Geetanjali Patil <geetashri@gmail.com>, Suruchi Ranadive <suruchiranadive@gmail.com>

Respected Debashish Nayak Sir,

Greetings from MVP Samaj's College of Architecture, Nasik.

We are hosting a conference on '**Urban Regeneration – A New Perspective to Heritage Conservation**' at our institute on 16th and 17th February 2016. The conference is aimed at brainstorming this new dimension of heritage conservation – urban regeneration. Indian cities are bestowed with diverse built and cultural heritage that give them a strong sense of belonging. With urbanization pressures, old core areas of cities provide opportunity for this regeneration activity and conservation of historic buildings and environs remains prime focus of such an endeavour.

The conference will try to identify and discuss issues related to development and implementation of such projects. Broad themes for discussion and presentation include re-designing of core areas for modern needs, government policies, rules and regulations, financial feasibility and management and community participation.

As per our telephonic conversations we would like you to present your thoughts and ideas at the conference as one of the key speakers on 16th February in Session 2. I take this opportunity to invite you for the event and request you to share your valuable knowledge with us.

Kindly convey the topic of your presentation and let us know your travel plans so that the flight bookings can be done at the earliest.

The broad outline for the 2 day conference is as follows

Day 1	16th Feb
Session 1	Dr Shikha Jain
Session 2	Debashish Nayak
Session 3	Ar Rahul Chemburkar
Day 2	17th Feb
Session 1	Ar Kiran Kalamdani
Session 2	Dr Benny Kuriakose

Thanking you

Respected Rahul Chemburkar Sir,

Greetings from MVP Samaj's College of Architecture, Nashik.

We are hosting a national conference on '**Urban Regeneration – A New Perspective to Heritage Conservation**' at our institute on 16th and 17th February 2016. The conference is aimed at brainstorming this new dimension of heritage conservation – urban regeneration. Indian cities are bestowed with diverse built and cultural heritage that give them a strong sense of belonging. With urbanization pressures, old core areas of cities provide opportunity for this regeneration activity and conservation of historic buildings and environs remains prime focus of such an endeavour.

The conference will try to identify and discuss issues related to development and implementation of such projects. Broad themes for discussion and presentation include re-designing of core areas for modern needs, government policies, rules and regulations, financial feasibility and management and community participation.

As per our telephonic conversations we would like you to present your thoughts and ideas at the conference as one of the key speakers on 16th February in Session 3. I take this opportunity to invite you for the event and request you to share your valuable knowledge with us. Kindly convey the topic of your presentation .

The broad outline for the 2 day workshop is as follows

Day 1	16 th Feb
Session 1	Dr Shikha Jain
Session 2	Debashish Nayak
Session 3	Ar Rahul Chemburkar
Day 2	17 th Feb
Session 1	Ar Kiran Kalamdani
Session 2	Dr Benny Kuriakose

Please do any modifications if necessary.
 Please let me know if you require any further details.

Profile

Benny started his career in 1984 and received the basic lessons in architecture under the tutelage of Laurie Baker. After receiving the Charles Wallace India Trust award for an MA in conservation studies at the University of York. He has received his doctorate from the Indian Institute of Technology, Madras

Benny is known more for his work for the design of the public buildings and the transplantation of the buildings in the Kerala Section of the craft village known as Dakshinachitra in Chennai. Recent architectural works include the Muziris Heritage Project, The Springdale Heritage Resort in Vandiperiyar, the design of the tsunami affected villages of Chinnangudi and Tarangmbadi in Nagapattinam District and the Harishree Vidyalaya School in Chennai.

Benny has authored the book 'Conserving Timber Structures in India' and one of the editors for the book ' Guidelines for the Preparation of a Heritage Management Plan'. He has offered his services as consultant to UNDP, various State Governments and other organizations.

Title

Sustainability of Built Environment Through Heritage & Conservation

History, conservation and heritage can be linked with development and they can form potential resources and assets for promoting non-formal education and tourism. The focus should be on the local economy generating local employment, promoting traditional industries, art and craft activities. Tourism and heritage management are integrated in this approach. One of the mistakes made in the case of some of the cultural tourism projects is the lack of co-ordination between the tourism administrators and the custodians of monuments. Economic value of heritage, which is sustainable, is important for the state of Kerala.

Ancient Kerala, renowned as the spice coast of India, was a major hub in the spice route trade, between South East Asia, Africa, Arab States and even Europe. At the centre of this spice trade was for centuries the ancient port of Muziris that has a history of 3000 years. The presentation will focus on the Muziris Heritage Project of the Government of Kerala as a case study.

Respected Sir,

We would like to suggest a change to your request of going back the same day. Mumbai Nasik is a 4 hr journey (depending on the traffic) and hence it would be slightly difficult to commute back to Mumbai in time to catch the flight.

We therefore suggest you to arrive in Nasik on 16th night. Please consider the following travel plan

16th Feb

Departure from Chennai Airport	15:35	(Jet Airways 9W 429)
Arrival to Mumbai Airport	17:30	
Departure from Mumbai Airport	18:00	(private car Transfer)
Arrival at Nashik	22:00	

17th Feb

Departure from Nashik	15:00	(private car Transfer)
Flight from Mumbai Airport	20:30	(Jet Airways 9W 487)
Arrival to Chennai airport	22:30	

Kindly send your confirmation for the above travel plan, for us to proceed with the bookings.

Thanking you
 Convenor
 Dr Prajakta Baste.
 Principal, MVP Samaj's College of Architecture
 Nasik.
